Distractions Cause Accidents

Don't become a road statistic

All road users, drivers, cyclists and pedestrians have a duty of care toward themselves and each other yet road injury, death and trauma [statistics](#) show no decline. Road accidents cause grief, death and destruction. 'If only I didn't answer that phone call', **if only** might be too late to save your life and that of others.

Consider the following life endangering distractions not to do whilst driving

- Driving under the influence of alcohol or drugs
- Using a phone to talk or text
- Daydreaming - wandering thoughts
- Drowsiness - Sleepy
- Eating or drinking
- Fiddling with radios, GPS, or other electronic gadgets

- Passenger distraction
- External distractions such as looking at Billboards, outside events, checking the surf, the list is endless

We've all been distracted whilst driving at some point in our lives, thankfully most of us survive but sadly some don't. We should all make an effort to pay more attention to our driving habits so as to avoid life threatening accidents or death. It only takes a second or two to become a statistic.

Schools out so be extra vigilant - Safe motoring.
